FLUIDWRITE TEST CASE

- Click the "Create A Document".

- Put title of your document in the writing section.

- Fill textbox with your writing.

- Then press the "Save" button to save the document.

- You will see the warning .If there is already a document with the same title,information of this document will be overwrited any previously existing document with the same title.Also you can put only 25 characters for title.This is rule.

- After this warning click "Ok" button.Then document will be saved on "My Document " page.You will see your documents on "My Document " page in alphabetical order.

- You can't save document without adding any title.Even though document has a title , you can not save your document without writing any words.

- When you want to change or to read your document,you can choose the title which you want to modify the document.Then press the "Load" button on the same page.

- Later article will be uploaded in big textarea.You can change both title and content of the document,then you can save it.

- When you want to see your documents which are uploaded before clicking "My Documents" page.All of the documents will seem with their title.

- In this "My Documents" page you have three options.You can delete,load and rename the document which you want

- To delete the document ,click "Delete" button.It will be deleted from database ,disk and "My Documents" page.

- When you click the "Rename" button.You can change only the title of document then you can save it again.

- Also "Load" button, when you click it.The document will be loaded.Then you can read,you can change content of document and can change the title of document and you can save it again.

- If you know the title of your document, you can search your document by title .
- If you want to get an information you can choose "About " section.
- Additionaly,you can start with clicking "Start Writting" button.You can the all of the same things with the same way.
